Education

University of Notre Dame

B.S. Computer Science, B.A. Philosophy - 3.85/4.0

Aug 2018 – Jan 2023

Notre Dame, IN

Papers

1. Steven J. Krieg, William C. Burgis, Patrick M. Soga, and Nitesh V. Chawla. Deep ensembles for graphs with higher-order dependencies. 2022 (under review)
2. Patrick Soga and David Chiang. Bridging graph position encodings for transformers with weighted graph-walking automata. 2022 (under review)

Research Experience

Notre Dame Department of Computer Science

February 2022 – Present

Undergraduate Research Assistant

Notre Dame, IN

- Developing a novel graph automaton-based positional encoding for graph transformers with Professor David Chiang. Paper in-progress.
- Assisted in developing an ensemble-based graph neural network architecture for higher-order networks (HONs) under Professor Nitesh Chawla.

REU at Notre Dame

June 2020 – August 2020

REU Participant

Remote

- Participated in NSF-funded research project under Professor Jane Cleland-Huang for developing software for guiding drones assigned to emergency response missions.
- Trained weather classification models for video provided by drones.

Work Experience

Lucy Family Institute for Data and Society

June 2021 – May 2022

Software Developer

Notre Dame, IN

- Worked under Professor Nitesh Chawla to build apps for HIMFG, a premier hospital in Mexico City, Mexico.
- Wrote web and mobile apps for gathering and managing patient medical information and assessing cancer patient risk.
- Human-computer interaction paper in-progress.

FloVision Solutions

July 2021 – March 2022

ML & Software Engineer

Remote

- Wrote Python scripts and infrastructure for ML ops, pipelining annotation data and deploying inference jobs with Docker using Google Cloud Platform.
- Worked on tuning CNN architectures using transfer learning techniques for recognizing and classifying images of food with TensorFlow for food waste reduction.

Million Marker

February 2021 – May 2021

Software Engineering Intern (part-time)

Palo Alto, CA

- Developed OCR functionality using Google's Tesseract and Amazon's Textract for extracting ingredients from product labels.

RJ Reliance

December 2020 – February 2021

Software Development Intern

Remote

- Wrote Python scripts to generate random datasets detailing job requisitions, job applications, and other data pertaining to HR according to weights assigned to parameters such as ratio of managers to workers, proportions of worker ages, etc. for showcasing core company products.
- Designed, implemented, and deployed a web frontend and corresponding REST API to interface with a MongoDB database.

CS for Good

August 2019 – August 2020

Non-Profit Service Project, Team Member

South Bend, IN

- Worked in a team of 4 to create a database and dashboard for Guate Te Incluye, a non-profit organization helping recently deported Guatemalan migrants reintegrate into the labor force.
- Wrote API endpoints in NodeJS for managing data of over 1100 workers.

Skills

Programming & Frameworks: PyTorch, Keras, Python, C, Dart, JavaScript, TypeScript, Bash, PostgreSQL, ReactJS, Angular, AngularJS, NodeJS, Flask

Software & Tools: Git, Ubuntu, Google Cloud Platform, Amazon Web Services, Google Firebase, L^AT_EX, Vim

Awards, Distinctions, & Activities

- iTREDS Scholar: competitive program for training students in data science for social good
- Building Bridges peer mentor (2021-2022): mentorship program for demographically underrepresented first-year students in computer science
- Silicon Valley Semester (Spring 2021): 1 of 27 selected computer science majors at Notre Dame to work a part-time internship at a tech startup in Palo Alto, California concurrently with coursework
- Philosophy club president (Fall 2020): recruited students and organized and led reading group in Eastern philosophy
- Dean's List (2018-2020)

Miscellaneous

- Citizenship: U.S.A.
- Languages: English (native), Japanese (basic)
